

# ALPHAGUARD™ BIO

A Virtually Odourless, Chemically Cured, Aromatic/Aliphatic Polyurethane Liquid Applied Roofing System Distinguished by its High Bio-Based Content.

## BEFORE/DURING

## AFTER

## Product Overview

The popular AlphaGuard™ BIO liquid applied roofing system can turn your older but still functional roof into a long-lasting, highly efficient weatherproofing system for a fraction of the cost of replacement. This unique, easily applied, versatile, durable, and technologically advanced product meets the need for a roofing solution that is tough on moisture but easy on the budget and the contractor's resources.

It is ideally suited for situations that demand a high-performance roof system, but where odour is not allowed, such as school and healthcare projects.

## Features & Benefits

- Economical
- Excellent cold-weather flexibility, tensile strength, and elongation properties
- Virtually Odourless
- Weathers extremely well
- Highly reflective
- Easy to maintain, keeping roof structures sustainable for the long haul
- Full, long-term warranties

Whatever kind of roofing system or deck a building has, the AlphaGuard™ BIO liquid applied roofing system is the right choice to bring it back to a watertight condition. And with these benefits, you don't need to look further when you need to revitalise a roof.

## Part of a Comprehensive Approach

We want to be entirely certain that the AlphaGuard™ BIO liquid applied roofing system is the right answer for your roofing needs, that it is correctly installed and provides long-term value. Your Tremco Construction Products Group (CPG) sales representative may recommend any or all the following:

- Infrared scanning and core testing
- Construction, condition and recommendation report
- Budget
- Project specifications
- Pre-construction meetings
- Project inspections during installation
- Final inspection
- Tremco CPG system warranty
- Long-term, planned roofing programs

## Roof Restoration

The AlphaGuard BIO system can extend the life of an aging but still functional single-ply, modified bitumen or built-up roofing system dramatically and efficiently. It will reduce the cost of re-roofing while providing a new, chemically superior, fire-rated, fully warranted waterproofing system. Best of all, this solution may be eligible to receive additional top coats at the end of its service life, which can further extend the life of the original roofing system, maximising the end user's return on investment.

## We Have Your Perfect Match

Besides the smooth surface, AlphaGuard BIO system is aesthetically pleasing and is available in a variety of colours that are suitable for creating safety and walkway designations.

Please contact your local representative to review our range of standard colours.

Tremco Construction Products Group (CPG) represents the combined power of brands including Dryvit, NewBrick, Nudura, Willseal, and Tremco, along with Tremco CPG affiliates Flowcrete, illbruck, Nullifire, Vandex and Euclid Chemical.
