

EUCLID CHEMICAL

INCRETE STAMPED CONCRETE

A range of stamping tools, rollers and cure & seal products that transform concrete to replicate the look of natural materials at a fraction of the cost.

INCRETE STAMPED CONCRETE FROM EUCLID CHEMICAL

Increte stamped concrete is extremely popular, because it replicates the beauty of nature at a fraction of the cost of natural materials.

With over 100 patterns and 900 colour combinations, the possibilities are unlimited whether you are blending with surrounding landscape elements or creating a unique, one-of-a-kind appearance. By applying special colouring effects to the surface, patterns come to life with realistic colour and texture variations. Creative and complex designs bring interest to otherwise bland concrete.

Sealing stamped concrete not only intensifies the colour but increases protection against weather and wear. Increte stamped concrete is a sturdy, durable, easy-to-maintain surface with superior longevity when compared to conventional concrete or pavers. Beautify any driveway, walkway, patio, deck, shopping centre or courtyard with the Increte stamped concrete system.
