

# PROJECT PROFILE:

## Nexus International School Campus

### Overview

Nexus International School Singapore Campus is the flagship school that has set a new benchmark for sustainability and digital technology innovations. The 13-storey “vertical” campus is unique in terms of its response to environmental context and it exemplifies a forward thinking approach to education space.

**Nullifire SC902** was chosen for its effective fast cure structural fire performance (for steelwork) with up to a 120-minute fire rating and early weather resistance. Its low VOC, one coat high build system helped save time and speed up the building process.

**Nullifire SC902**'s unique patented hybrid intumescent coating technology combines fast curing speed with tack free and versatile properties. This made it the superior choice for applicators, especially with regards to the application process during Singapore's high humidity season.

Tremco CPG Asia Pacific was honoured to have collaborated with renowned architect firm Broadway Malyan in building this iconic landmark and setting a revolutionary template for the school of the future.

<b>Completion Date</b>	April 2020
<b>Project Type</b>	Education
<b>Project Size</b>	6,000 m <sup>2</sup>
<b>Products Used</b>	Nullifire SC902
<b>Country</b>	Singapore

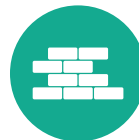

Fast-cure: early weather resistance, shower-proof within 1 hour.

Fire rating up to 120 minutes and tested to BS476 and EN13381: Part 8

Low VOC, high-build system with all ratings possible in one application.

Optimised for on-site application.
