

PROJECT PROFILE: Starbucks, Genting SkyWorlds

Overview

Located approximately 1,800 metres above sea level lies Malaysia's premier integrated resort destination, Resort World Genting (RWG). With over 10,500 rooms across seven distinct hotels, RWG also features leisure and entertainment facilities, including gaming, amusement attractions, as well as numerous dining and retail outlets.

Officially opened in 2022, RWG's newest attraction is the *Genting SkyWorlds* theme park. As a new build, the client chose to apply Flowcrete's **Mondéco Special** flooring finish to the Starbucks front of house areas because of its highly stylised and customisable designs.

Mondéco Special is a seamless epoxy resin terrazzo floor finish with aggregates including Mother of Pearl, glass, and crushed marble. For this project, the client required that the Starbucks logo be fitted into the flooring design and for the stone to match the colour that the interior designers had laid out.

Since the Terrazzo systems can be installed to virtually any design or pattern, and even outlined with aluminium trims for an added wow-factor, it is a popular choice for commercial venues looking to impress their customers with flooring that is visually stunning as well as durable and easy to clean.

Completion Date December 2021

Project Type Retail

Project Size 350 m²

Product(s) Used Mondéco Special

Country Malaysia

Seamless, high-performance flooring.

Attractive and customisable designs.

Hard-wearing & abrasion resistant, suitable for heavy foot traffic.

Hygienic and easy to clean.
