

LIQUID COLOR DISPERSION

GROUT COLOURANT

DESCRIPTION

Specially blended liquid pigments are specifically designed for use with the **TEXTURE-CRETE** overlay system. Highly concentrated, **LIQUID COLOR DISPERSION** can be used to add colour to any cementitious product. These colourants come in thirty standard colours with custom colour matching available. UV and weather stable, **LIQUID COLOR DISPERSION** can be used outdoors as well as indoors.

PRIMARY APPLICATIONS

For use with **TEXTURE-CRETE**, **SPRAY-DECK GROUT**, and **SINGLE COMPONENT SPRAY-DECK GROUT**.

FEATURES/BENEFITS

- Easy to mix
- Will not fade
- Dust-free
- Consistent colour
- May be also be used with a **LEVEL TOP SP** overlay systems

PACKAGING

Standard packaging is dosed for a 0.94 L container of mixing liquid.

SHELF LIFE

2 years in original, unopened container.

DIRECTIONS FOR USE

Shake **LIQUID COLOR DISPERSION** well before use. With a syringe, measure the correct amount of colourant based on the colour chart information. Add the colourant to the mixing water and blend lightly before adding to the grout. Use a 22.7 kg bag of white grout as the base and mix according to the specific product instructions. For best results, blend enough coloured water for the entire project if possible.

CLEAN-UP

Clean tools and equipment, and drips with hot, soapy water.

PRECAUTIONS/LIMITATIONS

- Protect from freezing
- For professional use only
- In all cases, consult the Safety Data Sheet before use
